🧩 Career Objective

To work as a Software Development Engineer, applying my knowledge in the field of design and maintenance to cater to the specific needs of the people. I wish to work in a team of motivated individuals who wish to work towards the advancement of the company and its goals.

🧰 Professional Experience

12/2020 – 05/2023

Software Development Engineer
World Fashion Exchange

Gurgaon, India

WFX Web ERP

- It is apparel software that can manage a company's entire product life cycle as well as plan Resources effectively.
- A new breed of Enterprise Resource Planning (ERP) software, which extends beyond a company's internal processes and connects to suppliers and buyers.
- It maintains the functionality of inward-looking core ERP Apparel systems and allows for features and functionality that can connect your entire value chain.

Roles And Responsibility

- I have worked on the smart factory project in which I have done the **front-end work using Angular** and back-end work using **Entity framework** and DB work using **SQL server**.
- I have worked on Angular, which is working with the latest Angular CLI and MS SQL DB.
- I have helped in the migration of the application from the .net framework to Angular where I have handled the complete angular project and all of its common new dev/modifications.
- I have created common reusable components and grid components, which we use to make pages and grids. API is created in .Net and the backend I used is SQL.
- Also, I am handling Loan Receipt, and Loan Payment screen completely with all the enhancement and bugs related.

💻 Computer Proficiency

- IDE(Visual Studio ,Visual Studio Code)
- SQL Server Management Studio (SSMS)
- Microsoft Word, Excel and other Microsoft apps for daily uses.

Technical Skills

- Angular
- Practical knowledge of SQL and database concepts
- .Net (Basic)
- Git
- Postman
- Typescript/Javascript
- Html
- Ag-grid
